

Flow Meter Kit 80495684 for RH Basic Systems

Recommended for use on CBP Tanks

FLOW METER KIT

Displays chemical flow (current flow rate and totalized volume) from up to four flow meters to the treater. Compact in-line design promotes accurate use of seed treatment products, stewardship and sustainability. Each component is precision tuned to work in tandem. All contact components are stainless steel construction. Works in conjunction with calibration beaker installed on CBP Tanks. Calibration kit may be ordered from accessory list.

Flow Meter Display

- Digital display provides real-time feedback
- Totalized treatment volume applied to seed
- Correction factor easily adjusted
- Up to four (4) flow meter ports
- Easy navigation between 4 flow meter displays
- Seed treatment product is calibrated by volume

- Easy one-step calibration* adjustment on the display. * Outside factors, such as temperature, humidity, elevation, etc., may affect calibration. Recommended to calibrate whenever seed variety, seed type or treatment media changes.

Flow Meter

- Helps prevent costly spills due to tubing malfunction
- Flow meter communicates with flow meter display
- Easy cleaning and maintenance - brushes included
- Cost effective and quality design - low cost replacement meters

Value Added Features

- Easy field installation
- Stainless steel mount bracket
- 115V power source required
- Components are modular for easy exchange
- High quality construction for industrial use
- 20' tubing included with kit

Guide to responsible Seed Treatment

BEFORE APPLICATION

- 1 Use only high quality products specially designed and approved for seed treatment
- 2 Keep the products in a locked room that is approved for crop protection products
- 3 Read the label and the directions for use carefully before using the product, especially the safety requirements
- 4 Protect yourself effectively - use gloves, glasses, mask, overalls, boots - as appropriate and according to each product label
- 5 Regularly check, maintain and adjust the seed treatment equipment to ensure accurate application
- 6 Treat only well cleaned seed to avoid contamination of yourself and the equipment by contaminated dust

DURING APPLICATION

- 7 Mix products properly according to the label; mix each product well with the water in the tank before adding the next product
- 8 Avoid spillage. Thoroughly clean any spillage to avoid contaminating the environment and waterways
- 9 Rinse the empty containers three times, pour the rinse water into the mixing tank and recycle the containers

AFTER APPLICATION

- 10 Ensure that access to treated seeds is not possible for children, the public or domestic animals
- 11 Avoid contamination of your hands when handling treated seeds
- 12 Clean the protection equipment. Wash your hands. Take a shower
